

RITI dot-Gov Project
Workshop on Accounting Separation
June 02-06, 2003

Organised for ANRC – Economic Regulating Division

Consultant

Markus STEINGRÖVER, Detecon International GmbH

Accounting separation - an extremely important issue for the Romanian regulating authority presently. The Economic Regulation Division needed to clarify ideas and solutions by discussing them with a consultant having had to deal with the issue and having enough experience to give directions and possible solutions in this area.

Mr. Steingrover, a senior costing and financial expert with widespread international experience in telecommunications, very familiar with costing methodologies was the right person to point out the significant aspects of this domain.

Starting in a little office...

Going on the next day in a larger one

*When asked about his opinion on the workshop, Radu Tudorache, Director of the Division replied:
“Excellent. Need I say more ?”*

For 4 day they really worked very hard, checking figures, looking for the best solutions, getting all possible information from the consultant.

Razvan Ionescu, the head of the Audit and Cost Accounting Service and Alina Adam thought the workshop was just what they needed and answered to all their present problems in elaborating a policy in accounting separation.
